Professional Summary

Web Developer with hands-on experience building, maintaining, and improving responsive web applications using JavaScript, React.js, Node.js, and modern front-end technologies. Skilled at troubleshooting application issues, implementing feature updates, and supporting users by translating technical problems into clear solutions. Experienced working within agile teams, collaborating with designers and developers, and delivering reliable web experiences across different devices and browsers. Passionate about improving usability, solving technical challenges, and continuously learning modern web technologies.

Professional Experience

Freelance Web Developer - Remote -- May 2024 – Present

- Developed responsive web applications using React.js and modern JavaScript, focusing on modular components and intuitive user experiences.
- Integrated third-party APIs and backend services, enabling features such as dynamic data loading and user interactions.
- Implemented CRUD functionality connected to Firebase and MongoDB databases for efficient data storage and retrieval.
- Deployed applications to Netlify and Render, maintaining stable and reliable hosting environments.
- Worked closely with clients to understand requirements, implement requested features, and deliver updates based on feedback.
- Integrated Google Analytics (GA4) into a React portfolio to monitor page views, project interaction metrics and user engagement events such as resume downloads and contact form submissions.

Junior Full Stack Developer - Vibranium Technologies (Contract) – Accra, Ghana -- Aug 2024 – Aug 2025

Reference: Peter Onisha Peregbakumo — **Position:** CEO | **Phone:** +233269056851

- Developed and maintained responsive web interfaces using **React.js**, **HTML**, **CSS**, and **Tailwind CSS**, improving usability and performance across desktop and mobile devices.
- Translated **Figma** design mock-ups into accessible, user-friendly web components with consistent layout and styling.
- Integrated front-end applications with **Node.js/Express REST APIs**, enabling secure data exchange and dynamic content updates.
- Troubleshoot and resolved application bugs and functionality issues, ensuring stable performance in production environments.
- Implemented feature updates and UI improvements based on team feedback and evolving project requirements.
- Collaborated with developers and designers in an Agile environment, contributing to sprint planning, development tasks, and code reviews.

Junior WordPress Developer - Primlysis Software Company (Contract) – Accra, Ghana -- Feb 2023 – Feb 2024

Reference: Martin Boadu Danso — **Position:** IT & Digital Innovation Manager | **Phone:** +233244229547

- Translated **Figma** design mock-ups into accessible, user-friendly web components with consistent layout and styling.
- Customized and developed WordPress themes from scratch and child themes using PHP, HTML5, CSS, JavaScript and Laragon.
- Implemented custom functionality via PHP templates and shortcodes, improving site flexibility and reducing client requests for layout changes.
- Optimized website performance by minifying CSS/JS, compressing images, and implementing caching solutions to improve page load time.
- Provided ongoing technical support and maintenance, and also resolved emerging plugin/theme conflicts.
- Ensured websites were cross-browser compatible, improving the user experience across different devices.

Education & Certifications

Professional Software Engineering Certification

CodeTrain Africa – Accra, Ghana - May 2024 – May 2025

Coursework: Full Stack Development, API Design, Data Structures, Agile Software Practices

Bachelor of Arts in Geography & Rural Development

KNUST – Kumasi, Ghana - Sep 2010 – Jul 2014

Technical Skills

Frontend: React.js, Tailwind CSS, Bootstrap, Zustand, jQuery, WordPress Theme Development, PHP

Design & Optimization: Responsive Design, Performance Optimization, UI/UX Best Practices

Backend: Node.js, Express.js, REST API design

Database: Firebase (Firestore), MongoDB, PostgreSQL (basic)

API Integration: REST APIs, OpenAI, GitHub workflows

Tools & Platforms: Git, GitHub, NPM, Yarn, Visual Studio Code, Zustand, Figma, Google Analytics (GA4)

Cloud & Deployment: Netlify, Render, Docker (basic), AWS (basic)

Projects

rentEasy-Gh App - <https://renteasy-gh.netlify.app/> (Current Project still working on it)

React + React Native + Nativewind + Tailwind CSS + Firebase (firebase storage) + Zustand | MongoDB

- Developed a responsive, user-friendly full-stack platform with modular React.js components for property management
- Integrated Firebase for real-time data storage and API connections, with MongoDB back-end support, ensuring intuitive interactions and seamless data handling for users

StyleSync Outfit Organizer - <https://stylesynce-outfit-oganizer.netlify.app/>

React + Tailwind CSS + Firebase + Zustand | AI Integration (OpenAI)

- Built high-performance, responsive full-stack UI with drag-and-drop features for intuitive outfit organization, focusing on UX excellence and back-end scalability.
- Integrated OpenAI API for dynamic recommendations alongside Firebase for data persistence, demonstrating seamless front-end/back-end connectivity and optimization.

Check-Box – <https://enchanted-kheer-ef03f2.netlify.app/>

React + Tailwind CSS + Firebase + Zustand | MongoDB

- Designed modular full-stack components with dynamic UI updates and API integration, optimized for responsive design, cross-platform use, and efficient database operations.

Lead Manager - <https://elegant-trifle-92ec82.netlify.app/>

React + Zustand + Node.js + MongoDB

- Implemented CRUD operations via REST API integration with Node.js back-end, featuring a clean, intuitive UI focused on performance and user-friendly interactions.
-

Additional Information

- Experience collaborating in Agile development teams using Git and structured workflows.
- Strong ability to troubleshoot issues and communicate solutions clearly to both technical and non-technical stakeholders.
- Comfortable working in fast-paced environments handling multiple development tasks and feature requests.
- Continuously learning modern web technologies and best practices to improve application quality and user experience.
